

Overview Statement 2013

A DYE DESIGN INC. is a landscape architectural firm, founded in 1998, specializing in planning and sustainable design for transportation, transit, urban design, recreation, and public art-oriented projects. The firm seeks projects in natural or urban space within the public sector that infill existing communities, create a sense of place, and honor natural and cultural systems.

A DYE DESIGN has completed projects as a member of interdisciplinary design and construction teams, featuring architects, engineers, artists, CM@R and other contractors. The firm has extensive experience in projects that feature the pedestrian, such as downtown redevelopment, transit centers, college campuses, streetscapes, and neighborhood traffic calming. A DYE DESIGN is currently located in downtown Telluride, Colorado, in the 1892 Nugget Building. The firm is a certified DBE/WBE in Colorado and Arizona.

A DYE DESIGN develops public involvement programs, workshops, and charrettes targeting participation by the public in defining their communities and advancing the principles of sustainable design. We have experience in LEED® and sustainable design, and the Sustainable Sites Initiative, SITES for both residential and public projects. The firm has completed several LEED® Silver, Gold, and Platinum certified projects.

The following is a partial list of recent project experience, which A DYE DESIGN brings to your projects.
